**E-mail: [kenneth\\_pope@sbcglobal.net](mailto:kenneth_pope@sbcglobal.net)**

**EDUCATION:**

Southern Illinois University at Edwardsville  
Bachelor of Science in Mass Communications  
Television and Radio Production  
Graduated May 1984

**OBJECTIVE:** Employment as an E-learning Programmer/Courseware Developer/Multimedia Developer or related area or field.

**SKILLS:** I program code for web and computer based training programs. I frequently use my skills and experience to create highly engaging training programs for SCORM compliant learning management systems. I also program 3D gaming and virtual reality training applications for computer, 3D gaming consoles, smart phones, tablets and the Oculus Rift headset. I record and edit multi-track audio as well as operate a video camera and edit video. I have often used my skills as a technical writer working with subject matter experts to create scripts for video and content for e-learning programs.

**APPLICATIONS:** I own and frequently use most programs in the Adobe Master Collection and Microsoft Office Suite. I am currently using Adobe Animate to reprogram Flash based applications to HTML5. I have extensive experience with Unity 3d Gaming software. Additional multimedia applications I work comfortably with include Adobe Audition (multi-track audio editor), 3D Studio Max, Adobe Acrobat Professional, Articulate Presenter, Captivate and Camtasia.

**PROGRAMMING LANGUAGES:** I have expert knowledge of JavaScript, HTML5, CSS3, ActionScript 1-3 and XML, and recently gained extensive C# experience programming 3D applications used in Boeing training programs. I enjoy learning new programming languages and skills, and possess the ability to understand and implement them quickly.

**WORK HISTORY**

**October 2007 to Present**

**SSE / Boeing**

**E-learning Specialist /Multimedia Developer**

- Use Adobe Master Collection, Microsoft Office, Unity and various Learning Management Systems, to create SCORM compliant web and computer based training programs, training apps for smart phones and tablets and 2D and 3D simulations for training presentations.
